

**Are you using lifting gear?
Did you know that we are fully
qualified to carry out LOLER
examinations?**

LOLER inspections, LOLER testing and Lifting Equipment inspection

What is LOLER?

LOLER stands for Lifting Operation and Lifting Equipment Regulations 1998

Lifting equipment and accessories for lifting must be systematically examined at suitable intervals by a competent examiner

- every 6 month- lifting accessories
- every 6 month- equipment used for lifting persons
- every 12 month- all other lifting equipment

Need assistance?

We have competent examiners to carry out Thorough examination of:

- Portable lifting equipment and accessories
- Tail lifts
- Counterbalance forklift trucks
- Scissor lift mobile elevating work platforms
- Personal Fall protection

Work together on LOLER compliance

A flexible approach tailored to work around the client's business whenever possible

We'll make it easy to ensure you can work safely and without worries about your lifting equipment

You've got lifting equipment provided for use or used by your employee. What do you do? Get in touch with us!

Our lifting equipment inspector will carry out a thorough examination of your lifting equipment to confirm it is safe to use.

We will add a color tag to the equipment to tell the operatives it has been examined

The inspection will be recorded and a thorough examination report produced.

We will arrange access for you to log on and download your equipment thorough examination certs any time.

We will remind you of your upcoming equipment examination
